

N S VISHNU VAMSI PILLA

Full Stack Developer — React.js | Next.js | Node.js | REST APIs | AI-Assisted Development

Andhra Pradesh, India | vishnuvamsi93@gmail.com | 9492148735 | [linkedin.com/in/n-s-vishnu-vamsi-pilla](https://www.linkedin.com/in/n-s-vishnu-vamsi-pilla)

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience designing and building scalable web applications across the stack — from React.js/Next.js frontends to Node.js/Express REST APIs. Strong track record in frontend architecture and performance (sub-2-second load times, Webpack Module Federation), paired with hands-on backend experience building CRUD APIs and database-driven modules. Currently an SDE-1 at SellersCommerce LLC, owning the Builder and Storefront modules of a website-building SaaS platform, with AI-assisted development (Claude Code, GitHub Copilot, LLMs, RAG, MCP) part of the daily workflow.

PROFESSIONAL EXPERIENCE

SDE-1 <i>SellersCommerce LLC</i>	May 2024 – Present
- Work on CommerceEdge, a multi-tenant SaaS platform that lets admin users build, customize, and publish fully functional websites without writing code — combining a CMS, a drag-and-drop page builder, and a live storefront rendering engine. - Own the Builder and Storefront modules end-to-end, enabling admins to manage products/categories, design pages via drag-and-drop with fully customizable styling, publish, and serve the rendered site to end users. - Drove frontend performance initiatives that brought storefront page response times to under 2 seconds, improving user experience and conversion-critical load metrics. - Architected scalable module boundaries using Webpack and Module Federation to support independent deployment of builder and storefront micro-frontends. - Used Web Workers and IndexedDB to offload heavy computation and improve client-side performance. - Use Claude Code and GitHub Copilot in day-to-day feature work — scaffolding, refactoring, and code review — to cut turnaround time on Builder and Storefront features.	
Software Developer <i>GSS Informatics Private Limited</i>	Mar 2022 – May 2024
- Led frontend development of Troven, an assessments portal for educators, students, and administrators, using React.js and Next.js to streamline assessment creation and execution. - Built Koneqto, a job portal connecting job seekers and employers, developing a seamless, user-friendly recruitment experience end-to-end on the frontend. - Developed the Good School educational portal, enabling students to access recorded classes through an engaging, responsive learning interface. - Contributed to backend development for 5 months, building REST/CRUD APIs for the student details module using Node.js and Express.js, supporting the backend team on data-driven features.	

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python
Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Ant Design, Tailwind UI Components, Google Maps API
Backend: Node.js, Express.js, REST & CRUD API Development
Databases: MongoDB, SQLite, SQL
Architecture & Performance: Webpack, Module Federation (Micro-frontends), Web Workers, IndexedDB, Performance Optimization
Product Practices: Localization (i18n), Accessibility (ADA/WCAG), SEO, Google Analytics, Socket.io (Real-time)
AI & Developer Productivity: Claude Code, GitHub Copilot, LLM Fundamentals, Prompt & Context Management, RAG (Retrieval-Augmented Generation), AI Agents & Skills, MCP (Model Context Protocol) Servers
Cloud & Tools: AWS, GitHub, REST APIs

LICENSES & CERTIFICATIONS

AWS Certification — Amazon Web Services (AWS) | Issued Jan 2022 | Credential ID: WXC9J7TDNJE11QSS

EDUCATION

Bachelor of Technology (B.Tech), Electrical and Electronics Engineering
Swarnandhra College of Engineering & Technology (JNTUK) 2019 – 2022 76%
Diploma, Electrical and Electronics Engineering
Vishnu Institute of Technology (SBTET) Jun 2016 – Apr 2019 86%
